Description

Alcohol denatured > 70%
Hydrogen peroxide (distilled water 10 vol)
Glycerine

Property

Contains antibacterial for deep and safe hand sanitization wherever you are. It is used without water and acts quickly. Works in 15 seconds. The sanitizing gel can be used at any time and in any place without the need for water, when, for example, one is in contact with sick people; away from home, whenever you come into contact with objects manipulated by others, for example on public transport, in the hospital, in the bathrooms; daily, when touching money, telephones or shopping. The product is also particularly suitable for healthcare professionals, such as doctors and paramedics etc.

How to use

Pour a small amount of gel on your hands and rub until completely absorbed. The sensation of stickiness caused by glycerin will disappear in a few seconds. Repeat several times within a day.

Sanitizing gel

Composition

The chemical composition of the gel includes all the active ingredients indicated by the O.M.S. World Health Organization. The high percentage of denatured alcohol > 70% used, in combination with hydrogen peroxide, also known as hydrogen peroxide, makes this product ideal for hand sanitization. Works in seconds. Furthermore, the formula is rich in substances with emollient and dermo-protective properties, such as the highest quality glycerine, capable of strongly attenuating the dryness of the skin. In fact, one of the major problems caused by the repeated applications of alcoholic solutions, which are commonly found on the market, is skin dehydration. In this formulation, the high percentage of glycerin is very effective in moisturizing the skin, protecting it against mechanical and chemical irritation and keeping it perfectly hydrated and soft.

Alcohol denat, Aqua, Hydrogen Peroxide, Xanthan Gum, Glycerin, Methylchloroisothiazolinone, Parfum, CI42090h.

U. M. STANDARD PARAMETER

Fluid gel

Appearance --- colorless

Odor --- Scented

Density g / ml at 20 ° C 0.870 - 0.900

Viscosity mPa s 400 - 900

pH U of pH 6.50 - 8.50

Methods of conservation and storage

Store in a tightly closed place away from heat sources.

Methods of conservation and storage

Store in a tightly closed place away from heat sources.

Warnings and safety advice

Avoid contact with eyes. Carefully follow the instructions and methods of use indicated on the label.

Type of packaging

Bottle of 80 250 500 and 1000 ml with cap. All primary packaging (bottles) are in high density polyethylene (HDPE); the constancy of the formulation and the technological process, used for the preparation of the packaging materials, give the packaging extremely easy to handle. The primary packaging does not contain latex and does not interfere in any way, either physically or chemically, with the product.
