Description

Massage made with Cellulite Thermal Massage Cream performs a drainage action, helping to reduce the "sponge" effect in the tissues that have no water. Regular and systemic use improves visibly the treated areas, the contours of the body appear more polished, toned, thinner and molded.

APPLICATION

In the morning apply the cream on the dry skin and massage it until full absorption (avoid or touch only parts with any varices and / or capillaries). For a more effective result pre-skin the skin with Cellulite Treatment Mud Treatment according to the application instructions.
