### Description

Thermal Spa Water represents a rich and balanced formula which has a remineralising action which boosts the effectiveness of specific active ingredients that help reduce and counteract the appearance of dark spots on the skin.

Rich and light, the formula protects against the pigmenting action of the sun's rays and leaves hands feeling soft and smooth.

Used regularly, it visibly lightens existing spots and counteracts their formation.

It gives greater evenness to the colour and the skin will thus look more even, younger and more supple. Its fine texture is fast absorbing and non greasy

### APPLICATION

Apply the cream to dry hands, gently massaging from the fingertips to the wrists. Continue the massage on the backs of the hands and where dark spots are most visible.

It should be used at least twice during the day.
