Description

Multi-active cream suitable for all those types of epidermis that need a special and deep moisturizing action. Shea Butter protects the skin from the harmful action of external agents, while Chitosans (extraordinary marine moisturizing active ingredients) maintain elasticity and prevent aging. From the first applications, the skin appears relaxed, luminous and rich in hydration.

How to use: suitable for all skin types. In the morning, after carefully cleaning and toning the epidermis, spread the cream on the face and neck, massaging gently until completely absorbed. The soft and velvety texture, easily absorbed, is an ideal base for make-up.
