### Description

Medium viscosity hyaluronic acid gel with shock effect. It gives an immediate result thanks to the anti-aging active ingredients present in this cosmetic, which reduce wrinkles and improve the ability to retain moisture. The skin is smoother, more compact and extremely hydrated.

How to use: after cleansing and toning the face, apply the product and massage it until it is absorbed by the epidermis and the hands are completely detached from the skin. Complete the daily treatment by applying the Damian Day Anti-Age Cream immediately after. Also to be used as a base before the Hyalu Mask.
