Description

Ischia Thermae Thermal Light Moisturising Cream is the result of highly advanced cosmetic and scientific research. The formulation combines extraordinary effectiveness with an amazingly lightweight texture. It was specifically designed to provide the skin with all the necessary nourishment without dulling. Thermal Light Moisturising Cream was formulated with Thermal Water, which is rich in essential trace elements. Active plant ingredients, moisturising Hyaluronic Acid, nourishing Wheatgerm Oil and emollient Jojoba oil combine to reinforce the natural functions of the skin. A sun filter helps to protect the epidermis from all types of light damage, even artificial. The lightweight texture of the cream allows for easier application and faster absorption. The skin is "thirst-quenched", elastic and soft without a greasy residue. The skin radiates with luminosity and well being for the whole day. Thermal Light Moisturising Cream is an excellent make-up base, making it stay fresh and intact for a long time.

APPLICATION

Apply the product to the cleansed and toned face and neck. Avoid the eye area. Light Thermal Moisturising Cream is mainly a daily cream, but can also be used as an excellent 24-hour treatment for younger skins or during brief holiday periods.
