Manufacturer [Ischia Le Terme della Bellezza](#)

Description

A really effective night treatment rich in active principles and oils such as **wheatgerm oil** and **sweet almond oil**, skilfully mixed with the **mineral salts** contained in the **thermal water of the island of ischia**. It works overnight by stimulating the natural cell renewal. The coenzyme **Q10**(i.e. taking part in several processes in comparison with the enzyme that participates in just one reaction process) is a powerful antioxidant able to fight free radicals and increase cell production. So, the Replenishing Night Cream helps rejuvenate early skin aging while developing a replenishing action. A steady daily use leads to a remarkable decrease of wrinkles and expression lines. Skin enjoys a smooth and soft appearance. Suitable for all skin types. Apply on face, throat and neck

Units in box: bottiglia
