ManufacturerIschia Le Terme della Bellezza

Description

It is the basis of a periodic, purifying and revitalizing treatment. The thermal mud, with its microgranules, performs a very delicate peeling, freeing the skin of impurities and dead cells, reducing excess sebum. The skin of the face regains purity and brightness, the features stretch, making the signs of fatigue and stress disappear. It is ideal for oily or combination skin. Apply a thin layer of mud avoiding the eye area, leave to act for about 10 minutes and remove with warm water, then dab with thermal tonic. It is then recommended to carry out a delicate massage with a moisturizing or nourishing cream, to restore the correct hydration of the skin
